Who we are

Dear colleagues & Partners / Well-Wishers,

We are felling very happy to introduce our new venture with Wide range of Sanitary ware products.

This Sanitary wares is a modernized international enterprise integrated with R&D, manufacturing, sales and services. We have a complete sales strategy and efficient sales team, applying brand strategy, setting up enterprise image, and being the advocator and pioneer in the field of world class sanitary ware.

Keep improving and striving for excellence is the core strategy to our quality requirement. The company is devoting itself to exploring deeper on global sanitary ware, so as to provide high- quality products and sincere, sophisticated services to the whole society and customer, to build up the better life for all humans. Manufacturing Facility Our use of innovative manufacturing technology means that we are able to create excellent quality sanitary ware products in the latest design at extremely competitive prices.

This sanitary ware is company that has big scale, high technology and a variety of products. it has over 17 series of sanitary wares including art basin, cabinet basin, wall-hung toilet, one-piece toilet, pedestal basin, wall-hung basin, counter basin, art basin, urinal.

From design to manufacturing, we only use the most technologically advanced material and processes. This has ensured our position as market-leader and innovative creators of sanitary and bathroom wares.

Quality Our company has established cooperative relationship with foreign countries that introduce advanced technology and management from Spain and Italy for reaching the international advanced standard of performance.

INSTALLATION

WALL HUNG BASIN

To install the wall hung basin, first grout the rag bolt into the cement or concrete wall. Then, secure the bolts to the wall and allow them to set before installing the basin using a nut and washer.

COUNTER WASH BASIN

It is recommended that a skilled or experienced person install the counter washbasin. Do not use adhesive with this product. Ensure that the waste area and supply tubing are checked if necessary. Only open the lavatory from its protective carton when ready for installation.

MATERIALS & TOOLS

You will need a measuring tape, keyhole or saber saw, hammer, glasses, rags or paper towel, drill (with a 1/2 inch diameter drill bit or larger), pencil, sealant, and a sharp knife or scissors.

INSTALLATION OF LAVATORY

When installing the lavatory, make sure to position it in a way that allows for future removal from underneath the counter top without damaging it. Check for clearance between the back splash, faucet, fixture, and cabinet in the desired location. Cut and carefully trace the template on the counter top, and mark the faucet hole centerline. Drill a 1/2 inch pilot on the inside of the cut line.

FOR WOOD COUNTER TOPS:

Mark and pre-drill the wood screw holes at the locations indicated on the template. Waterproof any exposed areas of wood.

FOR MARBLE COUNTER TOPS:

Position the counter top upside down on form padding to protect the surface. Mark and drill 3/6 inch holes 5/8 inch deep at the location shown on the template. Use a setting tool and hammer to secure the anchors.

FOR ALL INSTALLATIONS:

If the counter top has not been installed, do so at this time. Drill the faucet holes according to the faucet installation instructions. Install the faucet to the counter top according to the manufacturer's instructions, and then install the drain to the lavatory according to the same instructions.

MAINTAINANCE

MAINTENANCE

Regular maintenance is important to keep your bathroom looking great and lasting longer. Follow these tips to maintain your wash basin and closets:

WASH BASIN

Use a mild detergent to wash the basin at least once a day. After washing, wipe the basin dry to avoid water stains.

CLOSETS

Use a cleanser like Harpic and a soft plastic brush to clean the closet at least once a day. To avoid discoloration, brush the toilet after flushing. Keep the toilet brush handy in a convenient stand nearby. If there are water deposits or discoloration on surfaces that get wet, use a solution of dilute hydrochloric acid to remove stains.

To clean, use a soft cotton cloth and warm water with soap.

Do not use thinner, dry cleaning liquids, or powder.

Use a liquid cleaner at least twice a week.

For fine scratches, use Brasso or car rubbing compound and polish with a cloth.
